Dear Parents & Carers,

Re: Media coverage regarding Reinforced Autoclaved Aerated Concrete (RAAC)

Dear Parents and Carers,

You may have seen recent media coverage regarding Reinforced Autoclaved Aerated Concrete (RAAC) and its use in educational settings. RAAC is a lightweight form of concrete; because it is weaker than regular concrete, concerns have been raised about its long-term durability. Department for Education (DfE) has recently changed its guidance to education settings on the management of RAAC to take a more precautionary approach and as a result areas in affected spaces will be vacated.

We wanted to inform you that the schools within Pontefract Academies Trust are not affected by this decision as we do not have RAAC in any of our buildings and therefore, they will continue to function as normal. We understand that parents may want to know more about the support to educational settings to manage RAAC safely. You can read more about this through the article published by the DfE by clicking [here](#).

I hope that this offers reassurance.

Yours sincerely,

Mr J Parkinson  
Headteacher
